### Introduction

This release notes are for the RFD2000 Zebra RFID Manager for Android v1.0.7.32

---

### Updates over v1.0.7.22.4

1. Supports configuration through Stage Now and MDM clients SOTI, AirWatch and MobileIron

---

### Updates over v1.0.7.22

1. Fixes related to application unable to connect with reader after application crash when RFD2000 was removed from charging cradle
2. Optimization related to mgmt. application handling of reader when client application disconnects with RFD2000

---

### Description

The RFD2000 Zebra RFID Manager for Android enables the use of the RFD2000 as an accessory RFID sled for the TC20 premium Android terminal. It provides the following RFD2000 management functions:

1. Status – A quick snapshot of the currently attached and connected RFD2000
2. Settings – Various settings for controlling notifications generated by reader
3. Firmware update – Functionality related to updating reader firmware
4. Logger – Control various logging features and capture reader and/or application logs

# Zebra RFID SDK for Android

---
